

to 13 million odd numbers this way. To talk to the DeCamp amendment, the only reason why I put the amendment for a decal to have the county name on the bottom of this plate as opposed to stamped on was to save money. Now what Senator DeCamp is offering here is to print back now the number of the county on the stamping process. There is absolutely no need to have the decal across the bottom calling out the name of the county at that point because we have the numbering system back. Now Senator Haberman says he wants to have identification of his county. Why do we need the number if we have the name? I think people could relate more to the name than they can the number. I am strongly opposed to Senator DeCamp's amendment. I think the body has spoken this morning that we are trying to save some money, we are trying to establish license plates for the purpose they are originally intended, that is for identification, and not for advertising. I will oppose the amendment.

SPEAKER NICHOL: Senator DeCamp, for what purpose do you arise.

SENATOR DeCAMP: Mr. President, I am going to withdraw the amendment. I think you might give her a second thought on Final. I don't know, some good arguments on both sides but I will withdraw it for this time.

SPEAKER NICHOL: The motion is withdrawn. Do you have anything else?

CLERK: Mr. President, the next amendment I have is by Senator Wesely.

SPEAKER NICHOL: Is Senator Wesely here? Is Senator Wesely here? Okay.

CLERK: Mr. President, Senator Newell would move to amend LB 118: (Read Newell amendment found on page 1916, Legislative Journal.) Page 1, I assume, of the Warner amendment that was printed that says (inaudible)...okay.

SPEAKER NICHOL: Senator Newell.

SENATOR NEWELL: Mr. President, members of the Legislature. I am offering to strike in the Warner amendment Sections 3 and 4. Basically they are the sections that say we create a license plate cash fund or whatever and pay for the cost of license plates from this fund. The fund is \$1 for each plate which when one thinks about it, when one totals it up, you have a plate in the front and you have a plate in the back, that is \$2. I just want to say that I went home
